

Pacific Biosciences to Present at Annual J.P. Morgan Healthcare Conference

MENLO PARK, Calif., Jan. 6, 2011 (GLOBE NEWSWIRE) -- Pacific Biosciences of California, Inc. (Nasdaq:PACB), developer of single molecule, real-time (SMRT™) technology for biological analysis, today announced that Hugh Martin, Chairman and CEO, will present an overview of the company at the 29th annual J.P. Morgan Healthcare Conference in San Francisco on Tuesday, January 11 at 9:00 a.m. Pacific Standard Time. Mr. Martin's presentation will also be accessible via live webcast and archived <http://investor.pacificbiosciences.com/events.cfm>.

About Pacific Biosciences

Pacific Biosciences' mission is to transform the way humankind acquires, processes and interprets data from living systems through the design, development and commercialization of innovative tools for biological research. The company has developed a novel approach to studying the synthesis and regulation of DNA, RNA and proteins. Combining recent advances in nanofabrication, biochemistry, molecular biology, surface chemistry and optics, Pacific Biosciences has created a powerful technology platform called single molecule, real-time, or SMRT™, technology. SMRT technology enables real-time analysis of biomolecules with single molecule resolution, which has the potential to transform the understanding of biological systems by providing a window into these systems that has not previously been open for scientific study.
